Skidmore Community Garden Annual Report 201

- Arugula
    - Arugula did well, especiall

- Since there is so much variety in the size of the heads, in the future pricing by the

    - There were several self seeded volunteers from last year as well.
- Nasturtiums
    - They did best when planted at the ends of beds, rather than mixed in with other flowers. give them some space to bulk up.
- Three sisters
    - We coplanted corn, beans, and squash in the permaculture beds.
- Corn
    - We grew some sweet corn, which made a nice treat for some of the September volunteers. It was pretty and fun but we do not have the space for large quantities.
    - We also grew some popcorn, which germinated a bit better than the sweet corn.
- Pole Beans
    - We planted several varieties of pole beans to grow up the squash, including rattlesnake beans, which we sourced from my mother. Some rattlesnake bean seed was saved.
- Zucchini
    - [illegible]

even buy our own oats that are gluten free. We could h
